## PROFESSIONAL EXPERIENCE - 3.3 YEARS

Aug 2023- Ongoing

### Data Validation

I spearheaded the development of a robust Python-based tool designed to efficiently compare multiple large files. The tool seamlessly handles files stored in the Terminous system, while integrating with Source files sourced from FlexCube. It excels at generating comprehensive reports pinpointing data discrepancies, path errors, duplicate entries, as well as identifying missing primary and mandatory columns. This solution streamlines the process of file comparison, enhancing data accuracy and integrity.

May 2022- Dec 2022

### Predictive Analysis

To predict which customers are showing tendencies to leave the membership of the company we build a ML model to solve this problem. This involved cleaning of data, merging of files changing formats, generating reports, predicting trends based on their data, generating reports.

Jun 2021- Jan 2022

### Sentiment Analysis

Customer's sentiments towards company's Dairy product had to be checked. For this project Pandas was used, Natural Language processing tools were used, Machine Learning Model was used. Getting data, cleaning data, training the models, generating reports.
